

Satoyama Initiative Thematic Review vol.2

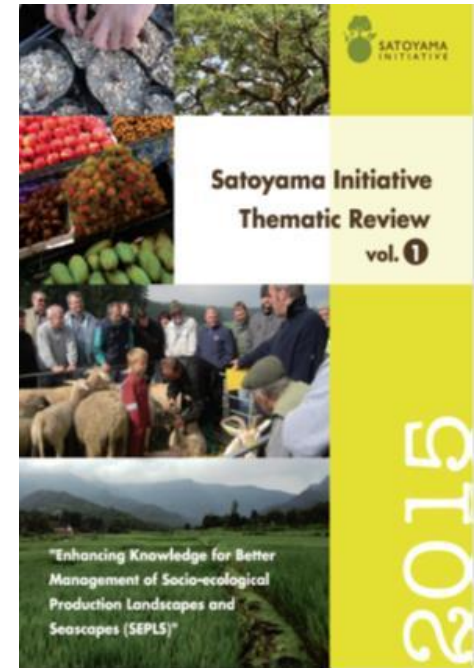

“Mainstreaming concepts and approaches of SEPLS into policy and decision-making”

Presented by
Suneetha M Subramanian
UNU-IAS @ COP 13, Cancun

Satoyama Initiative Thematic Review

- A compilation of case studies from IPSI members on a specific issue in SEPLS
 - Vol. 1: Tools and approaches for enhancing knowledge for SEPLS management
 - Vol. 2 Mainstreaming concepts and approaches of SEPLS
- Provide useful knowledge based on members' on-the-ground activities
- Make targeted contributions to policy and academic discussions to encourage the application of lessons learned in the field.

- IPSI Collaborative Activity (UNU-IAS and IGES)
- Initiated in 2015

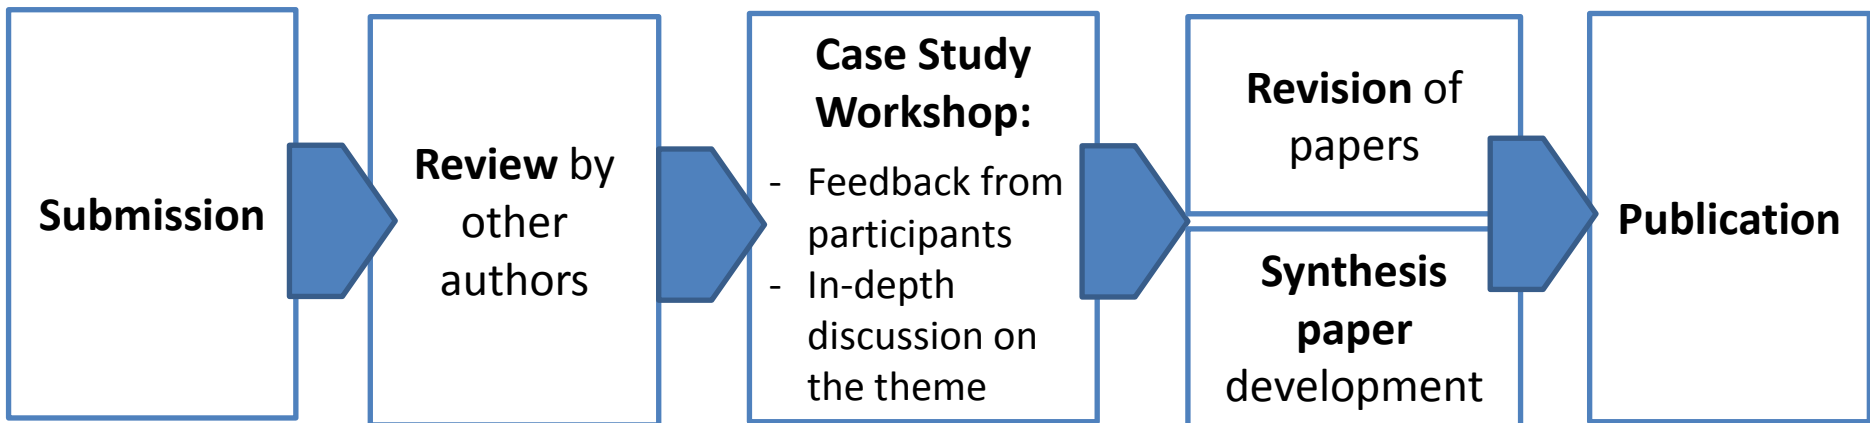

UNITED NATIONS
UNIVERSITY
UNU-IAS
Institute for the Advanced Study
of Sustainability

IGES
Institute for Global
Environmental Strategies

Publication process

- Developed through a multi-stage process
- Provide feedback on papers among authors
- In-depth discussion among authors

Satoyama Initiative Thematic Review

Vol 2

“Mainstreaming concepts and approaches of socio-ecological production landscape and seascapes into policy and decision-making”

Larger-scale adoption of activities for SEPLS conservation

- **Replication** of community level activities
- **Upscaling** by incorporating into policy-planning and implementation processes

Case Studies

Authors	Sites	Topic
Liu & Liu	Yunnan, China	Policies and development interventions related to forest use and traditional knowledge (TFRK)
Gualandi & Gualandi	Tuscany, Italy	Revitalization of ancient wheat varieties through coordinated links among producers, processors and others
Kieninger et al	Wachau, Austria	Policy tools and market mechanisms for cultural landscapes conservation
Lee et al	Hualien County, Taiwan	Tailoring of the concept of SEPLS in the planning of protected area planning
Olupot & Isabirye-Basuta	Mabira Central Forest Reserve, Uganda	Evaluation of landscape values for ecotourism in a Reserve Forest area
Kumar & Prajeesh	Kerala, India	Action research and advocacy projects for agro-biodiversity, livelihood improvement, and capacity building
Pandit et al	Four districts in Nepal	Development LBSAPs and domestication of wild herb species

Various dimensions of mainstreaming activities

- **Focuses of the activities**

Biodiversity conservation, resource management, sectoral activities, poverty and livelihood, cultural aspects, social equity

- **Socio-economic contexts**

Demography, literacy, knowledge, values, adaptive capacity, institutions, economic activities, power structure, policy and planning, climate change, disasters

- **Relevant sectors**

Agriculture, forest, tourism, protected area, production and consumption, etc

- **Existing policy/institutional framework utilized**

NBSAP, protected area zoning and management plan, regional laws on use of local products; agricultural subsidies, local action groups, etc

Overarching principles for successful mainstreaming

Mobilise knowledge towards action

- Integrate traditional and modern scientific knowledge on management of SEPLS for appropriate pathways for their conservation under different social, political and economic contexts
- Translate, transcribe and transform knowledge through inter- and trans-disciplinary approaches

Foster and leverage inclusive participation

- Foster a participatory approach to create a shared vision and identify composite or inter-linked goals that address multiple objectives
- Foster “collective efficacy” through:
 - Building trust among stakeholders
 - Identifying relevant institutions and define roles
 - Engaging higher political systems and get feedback
 - Encouraging cross-learning among communities and stakeholders for development of capacities and to raise awareness

Adaptive planning and management of activities

- Establish long-term monitoring and periodic review
- Make sure replication efforts are flexible
